ACADEMIND

Deployment Steps

Test Code

Optimize Code

Build App for Production

Upload Production Code to Server

Configure Server

ACADEMIND

Lazy Loading

Load code only when it's needed

ACADEMIND

A React SPA is a “Static Website”

Only HTML, CSS & JavaScript

ACADEMIND

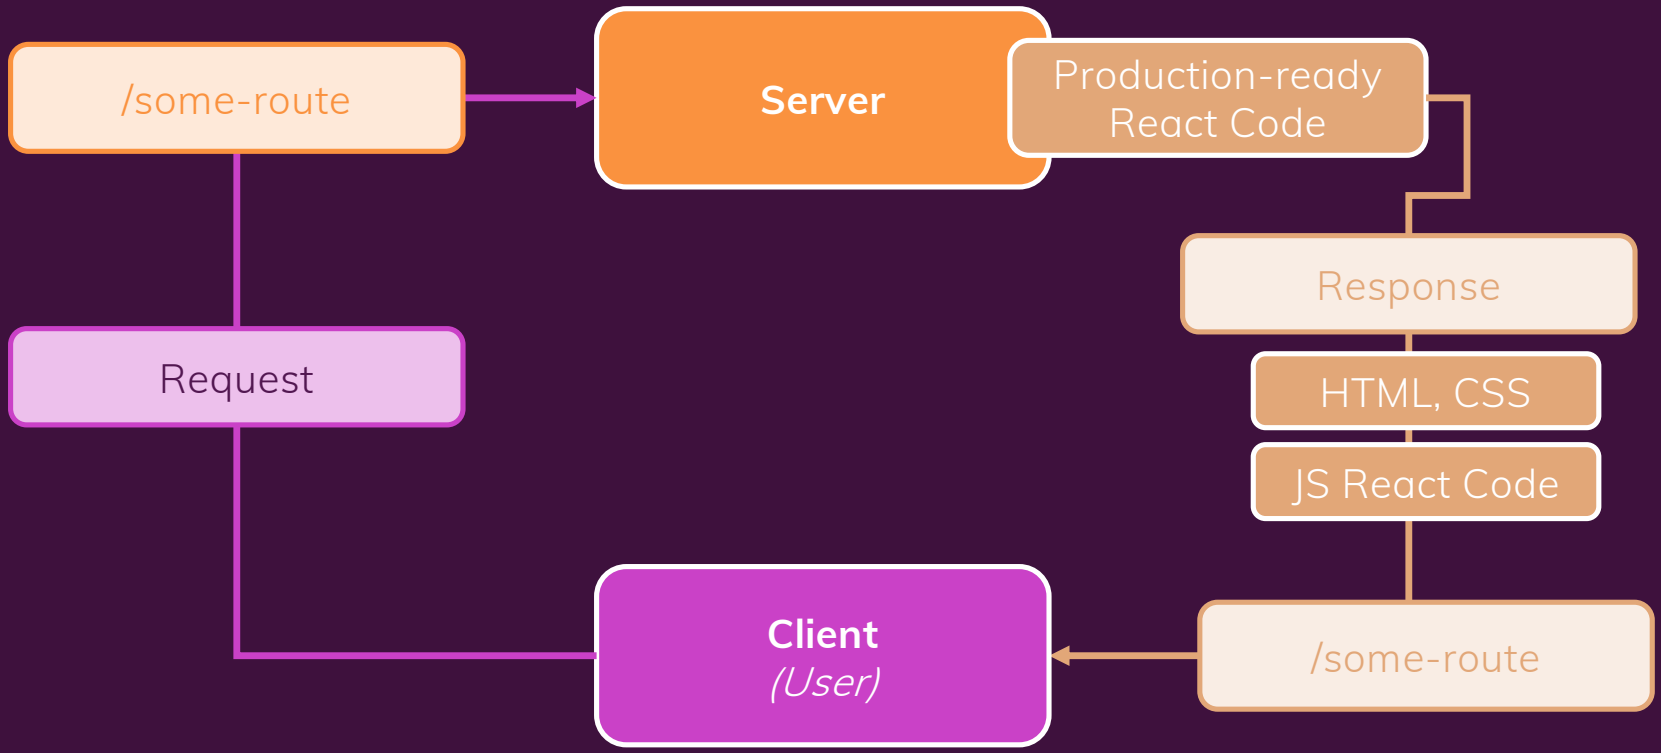
A React SPA is a "Static Website"

Only HTML, CSS & JavaScript

A Static Site Host Is Needed

ACADEMIND

Server-side Routing vs Client-side Routing



ACADEMIND

Server-side Routing with SPAs

The server must be configured to **always return the index.html** file and ignore the route

Then, React Router (client-side) can take over and render the correct page content
